- Long-lasting, flickering bulbs won't leave a waxy mess like candles.

### Specifications

Candles: 6  
Distance between candles: 16

### Dimensions

Size: 2" H x 2" diameter each

Ordinary candles can add atmosphere to any intimate party, but any open flame has the potential for disaster. If you have young kids or pets or just prefer not to light candles near your valuable possessions, the electric Candle Chain provides a smart substitute lighting option that's both safe and economical.

Set the Candle Chain on your mantle or use the attached clips to set the Candle Chain in any desired position. You can even clip these candles safely to a Christmas tree. Connect up to three chains together for a longer light string.

These six candles are powered by a single power adapter, and their bulbs will last much longer than ordinary wax candles, without leaving a drippy mess. They even flicker like real candles!
